DETAILED ACTION

1. This communication is in response to Applicant's preliminary amendment filed on August 27, 2003. The rejections cited are as stated below:

*Claim Rejections - 35 USC § 112*

2. Claims 8-12, and 14-16 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, claims 8, and 14 the limitations " --- the predetermined minimum level --- ", and " --- the minimum number of factors --- " respectively. There is insufficient antecedent basis for these limitations in the claims. Appropriate correction is required.

*Claim Rejections - 35 USC § 101*

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 14-16 are rejected under 35 U.S.C. § 101 because; the claimed invention is directed to a non-statutory subject matter. Specifically the method claims as presented claim a technological basis only in preamble not in the body of the claims. The preamble and the disclosure clearly indicate that all of the steps are performed using a computer, by claiming only the preamble using a computer, the claim may be interpreted in an alternative as involving no

more than a manipulation of an abstract idea and therefore non-statutory under 35 U.S.C. 101. In contrast, a method claim that includes in the body of the claim at least one structural / functional interrelationship which can only be computer implemented is considered to have a technological basis [See Ex parte Bowman, 61 USPQ2d 1669, 1671 (Bd. Pat. App. & Inter. 2001) - used only for content and reasoning since not precedential].

In order to overcome the 101 rejection above, the use of the computer in the body of the claim should include at least one structural / functional interrelationship which can only be computer implemented for all the claimed limitations.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claim 30 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hani Kazimi whose telephone number is (703) 305-1061. The examiner can normally be reached Monday-Friday from 8:30 AM to 5:00 PM.
